What was wrong earlier / what's true now

- Earlier recon built its own headcounts (and dropped kids / mismatched meals). Ashtami "93 NV lunch" was actually Ashtami dinner NV (93) — lunch is 439 veg / 0 NV.
- Source of truth is now the Food reports page: confirmed plates + vendor meals (awaiting payment OFF), same as the kitchen dashboard screenshot.
- Excel vs Food reports on seating/L/D: variance only ■510 (Excel ■7,06,140 vs reports-cost ■7,05,630).
- Complimentary plates are included in vendor cost (you pay the caterer). Paid extras on Ashtami lunch = 17 plates.
- Breakfast packets are on Food reports but not on the Excel — shown separately (~■38,000 if billed at sheet breakfast rates with packet round-up).

Material variances explained

Sasthi breakfast Excel 210 vs Reports 240

Excel under-counted seating by 30 (incl. 7 vendor).

Saptami NV dinner Excel 119 vs Reports 111

Excel 8 above portal — likely kitchen buffer / walk-in.

18 Oct NV lunch Excel 123 vs Reports 127

Reports 4 higher (portal has more booked plates).

Dashami NV lunch Excel 180 vs Reports 173

Excel 7 above portal.

Ashtami lunch / dinner NV

Lunch = 439 veg only. The 93 NV is dinner — not lunch.
